

Dear Sir/Mam,

I am writing to express my interest in the Data Analytics Internship position at PrimePay. As a current Master's in Data Science student at NJIT, and with two years of experience as a Data Analyst, I am confident in my ability to make a meaningful contribution to your team.

During my tenure as a Data Analyst, I have honed my skills in using data analytical tools like Tableau and Python Libraries. I have completed several projects where I have built multiple Machine Learning models for regression and classification tasks, which were accompanied by thorough data cleaning, preparation, and regularization as needed. I have a strong understanding of model competency based on the nature of the problem, and my experience has given me a good grip over playing with data.

Plus, I also work as a part time Research Analyst in the department of sustainability at NJIT itself. So, even during my Graduation I am practicing my Data Analytical skills along with the course curriculum to get more proficient.

I believe that my skills and experience make me a strong candidate for this position. I have a passion for working with data and am committed to delivering high-quality work that meets the needs of the organization. I am also a team player who can work well in a collaborative environment.

Thank you for considering my application. I am excited about the opportunity to contribute my skills and experience to PrimePay as a Data Analytics Intern. I look forward to the opportunity to discuss my application further.

Sincerely,
Mantavya Soni
